

POTTED ROSE GUIDE

Thank you for purchasing one of our beautiful potted roses. Your new rose has been packed with care and should arrive to you in good condition. If you have any concerns about the condition or quality, please contact us immediately.

As soon as you receive delivery, remove rose from plastic bag. Place outside in a sunny position and give it a water. Your rose will be thirsty after its trip!

LEAVING IT IN OUR POT?

No problems! Keep well watered in a sunny spot. (You may need to re-plant into a larger pot in winter)

I WANT TO PLANT IN ANOTHER POT

We suggest a pot at least 50cm x 50cm. Be sure to use a premium potting mix & don't disturb the existing root system when transplanting. Once planted, give it a good water.

Transplant in cooler weather - not in the heat of the day!

PLANTING IN THE GARDEN

Your rose will love full sun all day, good drainage & of course, plenty of water (especially in the warmer months).

It's important not to disturb the roots when transplanting a potted rose.

WATER IS THE KEY!

Water every 1-2 days depending on weather. Remember, potted roses require more frequent watering than those in the ground.

MORE INFORMATION

Visit our website for more detailed information on transplanting & care of your potted roses.

FEED YOUR ROSE!

We have recently fed your rose for you. Regular feeding with a quality rose food is essential for great performing roses.

SEASONAL ROSE PLANNER

Try to hold off pruning until after the main frost

SUMMER

- Feed (mid Summer)
- Dead head (Summer prune)
- Visit Treloar Roses display garden

WINTER

- Plant your bare root roses
- Prune existing roses
- Spray with lime sulphur
- Mulch

AUTUMN

- Feed early Autumn
- Start preparing soil for new Winter plantings
- Order bare root roses

SPRING

- Feed using quality rose food
- Start spray routine for pest & disease control (prevention is better than cure)
- Enjoy those beautiful roses

Regular feeding with a quality rose food will keep your roses healthy & encourage beautiful blooms all season!
